

Guide to WSDL-file Interface for abattoirs (Animal Welfare Database request eligibility of delivery/payment or participation authorization)

The interface is implemented as an **extension of the existing interface for abattoirs in the QS database** (see interface specification https://www.q-s.de/services/files/datenbank/schlachtbetriebe/Schnittstelle_Schlachthof.pdf).
This document is intended as a guide. Technical details on fields and types can be found in the **WSDL**- file.

WSDL is here:

https://www.q-s.de/services/files/datenbank/schlachtbetriebe/open_access_akt.wsdl

In this document the messages are described with the English terms.

A test system is here: <https://test.qs-plattform.de/axis/services/rpcrouter?wsdl>

Function SelectQSTW(QSExtLocationStandardQuery)

Input: location number

(The *transmission of the production scope is possible but not necessary (0 or empty)*; as a production scope you can give over a single one or an area (e.g: Input 2001 or only 2000, see in the list of production scopes https://www.q-s.de/services/files/downloadcenter/2_arbeitshilfen/buendler/ah_prodart_list_frei_01012017_en.xlsx).

Return: QSExtLocationQSTWReply

You receive all individual production scopes that are currently available with the following information to eligibility of delivery (QS) / payment or participation authorization (animal welfare):

- Production scope:
(eg. *output 2001, 2002, 2004 ...*)
- Eligibility of delivery QS:
 - 0= no
 - 1= yes
 - 2= inactive (Pig production locations, which have been scheme participants for at least six months but no sampling was conducted, will get the status "inactive" and will be excluded from delivering pigs into the QS scheme until a sample is taken and verified in the salmonella database)
 - 3= blocked (no eligibility of delivery)

Description:

- FIAS, for a conducted FIAS audit
- FB, if it is a location run by the family
- REGIO, for a passed "Regionalfenster" audit
- IP, if there is an integrated production scheme
- INACTIVE, excluded from delivering pigs into the QS scheme until a sample is taken and verified in the salmonella database
- PREFAT, fattening – pre-fatteinign, only; blocked for the delivery of pigs to an abattoir
- Payment/participation authorization Animal welfare:
 - true
 - false
