! **Note:** If you need a placeholder, please enter the percent sign (%) (e.g. when filtering name, location number, etc.)

1 Maintaining master data

Maintaining master data

As a scheme participant, you can do the following in the Animal Welfare Database:

- View and manage your master data
- Switch between the QS software platform and the Animal Welfare Database (single sign-on)
- Transfer the locations that you have recorded in the QS software platform to the Animal Welfare Database and manage them
- Register and de-register locations
- Store your contractually agreed species for the public search function
- Change certification bodies
- View audit reports

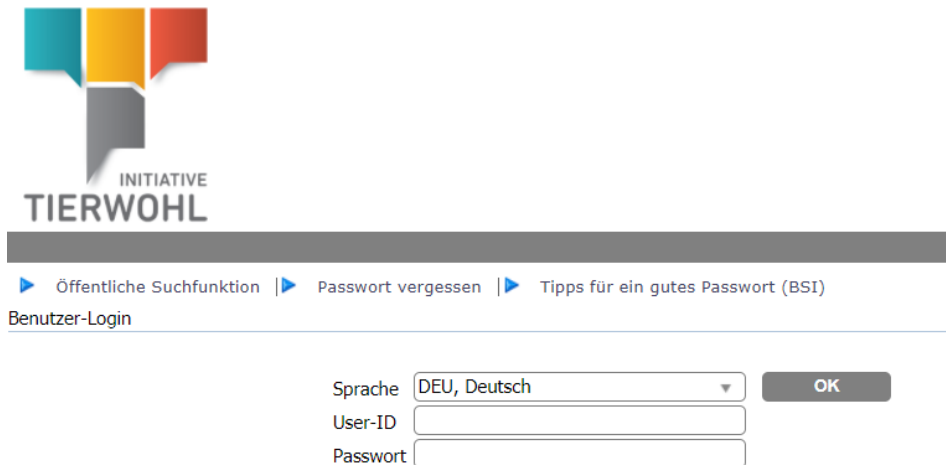

2 Logging into the Animal Welfare Database

Logging into the Animal Welfare Database

2.1 Enter login data

After signing the contract, you will receive an email (to the legal representative's stated email address) containing your login details for the Animal Welfare Database.

<https://datenbank.initiative-tierwohl.de/QSTierwohl/start/do>

The screenshot shows the login page for the Initiative Tierwohl database. At the top left is the logo with three colored speech bubbles (teal, yellow, red) and the text 'INITIATIVE TIERWOHL'. Below the logo is a dark grey horizontal bar. Underneath the bar are three links: 'Öffentliche Suchfunktion', 'Passwort vergessen', and 'Tipps für ein gutes Passwort (BSI)'. Below these links is the text 'Benutzer-Login'. The main login area contains a language dropdown menu set to 'DEU, Deutsch', an 'OK' button, and three input fields for 'User-ID' and 'Passwort'.

- Enter user ID
- Enter password

Forgotten your password?

Forgotten password

Click on the "Forgotten password" menu and enter your user ID. A new password will be emailed to you via the legal representative's saved email address.

2.2 Change password

For security reasons, we advise changing your assigned password immediately and then at regular intervals.

- Enter old password
- Enter new password
- Repeat new password

3 Single sign-on (SSO)

As a scheme participant, if you have login details for the QS platform and the Animal Welfare database (and the same username for both), and are logged in to either of them, you can easily switch between the two applications.

Clicking on the corresponding link (see below) opens up the partner application in a new tab.

In the QS platform:

In the Animal Welfare Database:

4 Transferring location data from the QS platform to the Animal Welfare Database

4.1 Transferring locations from QS to Animal Welfare

The locations you registered when signing the contract are automatically transferred along with the scheme participant to the Animal Welfare Database. If one (or more) of an Animal Welfare Initiative scheme participant's other locations gains eligibility of delivery at a later date, you can transfer the master data for the location(s) (incl. a contact person) to the Animal Welfare Database from within the QS platform under **Master data > Locations**. For instructions on how to use the QS platform, please refer to the corresponding [instructions](#).

To do this, open the location record and click on the *Transfer to Animal Welfare Database* button (top right of the location record).

Please ensure that the telephone number and email address has been entered for the stored contact person(s) in the QS database location record, otherwise an error message will appear when transferring the data. If the contact person for the Animal Welfare Initiative is different, you can change this in the Animal Welfare Database after transferring the record.

Note: If the location is already present in the Animal Welfare Database, the "Transfer to Animal Welfare Database" button will not appear.

Once the transfer is complete, you can access the location in the Animal Welfare Database, add the certification body and register the location (**see 5.3**). You can also choose from the contractually agreed species in the location record and place a check mark next to the relevant species. The selected species will be displayed in the public search function.

Register button

Register location button

This is where you can register a location that has an "Eligible for registration" status and a specified certification body.

De-register button

De-register location button

This is where you can de-register a location.

Change certification body button

Change certification body button (Location set to "Registered")

This is where you can change the certification body for a location if the location has already been set to "Registered".

Select/Change certification body

5.2 Select/Change certification body action

Location prior to "Registered" status:

If the location has not yet been set to "Registered", the certification body can be selected or changed via the "Select" button  next to the certification body field. "Certification body" field in the detailed location view:

Zertifizierungsstelle * 

Click on the *Refresh*  button to display the certification bodies, then click on the blue *Selection* arrow  to select the relevant certification body.

Betrieb registrieren: > Standortdaten > Bitte Zertifizierungsstelle auswählen!
Anzahl ausgewählter Sätze in Zertifizierungsstellen: 1

Suchkriterien: %QS%
Sortierung: Name

ID: 0

Zertifizierungsstellen:

Name	QS-ID	Schweinemast	Sauenhaltung	Ferkelaufzucht	Hähnchenmast	Putenaufzucht
QS Qualität und Sicherheit GmbH	4031735373653	X	X	X	X	X

The selected certification body will appear in the field and you can confirm the selection by clicking the OK button.

Location post "Registered" status:

If the location has been set to "Registered", you can only change the certification body by clicking on the *Change certification body*  button.

To do this, click on the *Selection* button  in the detailed location record and select the new certification body.

Location registration

5.3 Register location action

The *Register* button  appears in the detailed location record if the location status is set to "**Eligible for registration**". The registration date is then automatically populated with the current date in the location tab and the status set to "**Registered**".

Location re-registration (after de-registration)

5.4 Re-register location action (after de-registration)

A location that has previously been registered can be re-registered. Clicking on the *Re-register* button automatically populates the registration date with the current date and sets the status to "**Registered**".

Location de-registration

5.5 De-register location action

If a farm wishes to cancel its participation in the Animal Welfare Initiative, you can either de-register the location immediately by clicking on the *De-register* button  or by entering a future de-registration date (= cancellation date) in the detailed location view. The location will then be definitively de-registered on the saved de-registration date.

Standorte > Standort > Abmelden

Abmeldedatum  

Mo Tu We Th Fr Sa Su

	1	2	3	4	5	
6	7	8	9	10	11	12
13	14	15	16	17	18	19
