Explanation of icons in the Animal Welfare Database

• Note: Please note that you should not use the "back" button in your browser. Please also note that you should not click on any buttons before a page has finished loading. Your browser displays the loading status of a web page.

• Note: If you need a placeholder, please enter the percent sign (%) (e.g. when filtering name, location number, etc.)

Version: 30/09/2022 Status: • Release Page 3 of 14

1 Maintaining master data

Maintaining master data

As a scheme participant, you can do the following in the Animal Welfare Database:

- View and manage your master data
- Switch between the QS software platform and the Animal Welfare Database (single sign-on)
- Transfer the locations that you have recorded in the QS software platform to the Animal Welfare
 Database and manage them
- Register and de-register locations
- Store your contractually agreed species for the public search function
- Change certification bodies
- View audit reports

2 Logging into the Animal Welfare Database

Logging into the Animal Welfare Database

2.1 Enter login data

After signing the contract, you will receive an email (to the legal representative's stated email address) containing your login details for the Animal Welfare Database.

https://datenbank.initiative-tierwohl.de/QSTierwohl/start/do

- Enter user ID
- Enter password

Forgotten your password?

Forgotten password

Click on the "Forgotten password" menu and enter your user ID. A new password will be emailed to you via the legal representative's saved email address.

Version: 30/09/2022 Status: • Release Page 4 of 14

2.2 Change password

Change password

For security reasons, we advise changing your assigned password immediately and then at regular intervals.

- Enter old password
- Enter new password
- Repeat new password

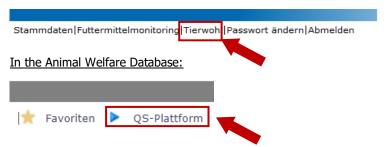

3 Single sign-on (SSO)

Single sign-on

As a scheme participant, if you have login details for the QS platform and the Animal Welfare database (and the same username for both), and are logged in to either of them, you can easily switch between the two applications.

Clicking on the corresponding link (see below) opens up the partner application in a new tab.

In the QS platform:

Click on the Animal Welfare or QS platform link

4 Transferring location data from the QS platform to the Animal Welfare Database

4.1 Transferring locations from QS to Animal Welfare

The locations you registered when signing the contract are automatically transferred along with the scheme participant to the Animal Welfare Database. If one (or more) of an Animal Welfare Initiative scheme participant's other locations gains eligibility of delivery at a later date, you can transfer the master data for the location(s) (incl. a contact person) to the Animal Welfare Database from within the QS platform under **Master data** > **Locations**. For instructions on how to use the QS platform, please refer to the corresponding **instructions**.

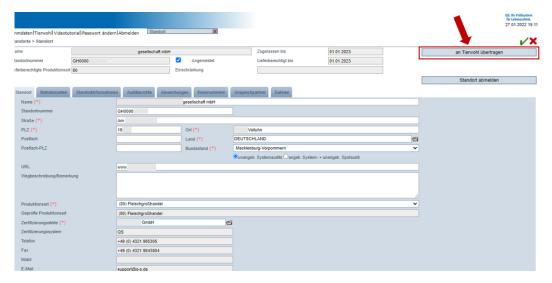

To do this, open the location record and click on the *Transfer to Animal Welfare Database* button (top right of the location record).

Please ensure that the telephone number and email address has been entered for the stored contact person(s) in the QS database location record, otherwise an error message will appear when transferring the data. If the contact person for the Animal Welfare Initiative is different, you can change this in the Animal Welfare Database after transferring the record.

Transferring data from QS to Animal Welfare

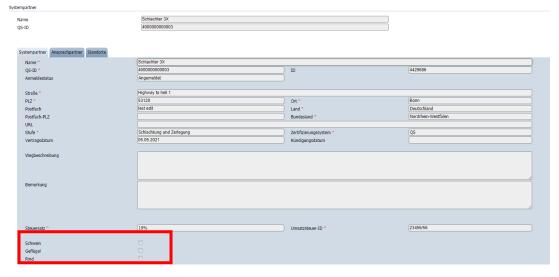

Version: 30/09/2022 Status: • Release Page 5 of 14

Note: If the location is already present in the Animal Welfare Database, the "Transfer to Animal Welfare Database" button will not appear.

Once the transfer is complete, you can access the location in the Animal Welfare Database, add the certification body and register the location (**see 5.3**). You can also choose from the contractually agreed species in the location record and place a check mark next to the relevant species. The selected species will be displayed in the public search function.

Add a check mark for relevant species in location

Contact person tab

Contact person tab:

This is where you can display and manage your contact person(s).

Register button

This is where you can register a location that has an "Eligible for registration" status and a specified certification body.

De-register button

This is where you can de-register a location.

Change certification body button

This is where you can change the certification body for a location if the location has already been set to "Registered".

Changes to the scheme participant master data

You can make changes to the master data yourself. To do this, change the desired information and save the change. The message "The changes you have made require approval from the Gesellschaft zur Förderung des Tierwohls in der Nutztierhaltung mbH (ITW). Your change will only be visible once it has been approved. The data can no longer be changed until it has been released." appears.

Register location but-

De-register location button

Change certification body button (Location set to "Registered")

Changing master data

5.2 Select/Change certification body action

Select/Change certification body

Location prior to "Registered" status:

If the location has not yet been set to "Registered", the certification body can be selected or changed via the "Select" button next to the certification body field.

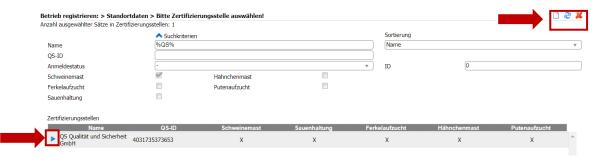

"Certification body" field in the detailed location view:

Zertifizierungsstelle * - - -

Click on the *Refresh* button to display the certification bodies, then click on the blue *Selection* arrow to select the relevant certification body.

Version: 30/09/2022 Status: • Release Page 11 of 14

The selected certification body will appear in the field and you can confirm the selection by clicking the OK button.

Location post "Registered" status:

If the location has been set to "Registered", you can only change the certification body by clicking on

the Change certification body buttor

To do this, click on the *Selection* button ¹ in the detailed location record and select the new certification body.

5.3 Register location action

Location registration

The *Register* button appears in the detailed location record if the location status is set to "**Eligible for registration**". The registration date is then automatically populated with the current date in the location tab and the status set to "**Registered**".

5.4 Re-register location action (after de-registration)

Location re-registration (after de-registration)

A location that has previously been registered can be re-registered. Clicking on the *Re-register* button automatically populates the registration date with the current date and sets the status to "**Registered**".

5.5 De-register location action

Location de-registration

If a farm wishes to cancel its participation in the Animal Welfare Initiative, you can either de-register the location immediately by clicking on the *De-register* button or by entering a future de-registration date (= cancellation date) in the detailed location view. The location will then be definitively de-registered on the saved de-registration date.

Once you have clicked on the *OK* button ok ok, the desired de-registration date is entered in the location record under "De-registration date".

Version: 30/09/2022 Status: • Release Page 12 of 14

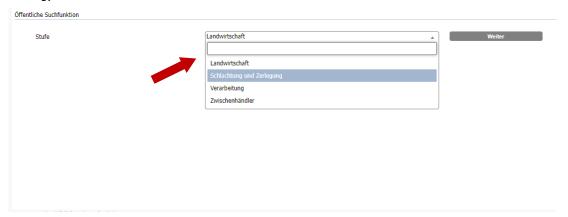

Note: To de-register a scheme participant's last registered location, please contact the operating company.

5.6 Public search function

Public search function

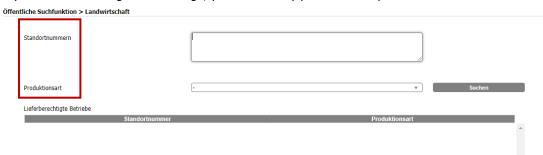

The public search function can be accessed without logging in. This means that anyone can use it to search for and view locations that have eligibility of delivery.

Step 1: In step one, you can select the **Stage** (agriculture, slaughter/deboning, intermediary or processing).

Step 2:

If you selected the "Agriculture" stage, you can filter by production scope:

If you selected the "Slaughter/Deboning", "Intermediary" or "Processing" stage, you can filter by name, QS ID, postcode, town/city or country.
