

Guide to WSDL-file Interface for abattoirs (Animal Welfare Database request eligibility of delivery/participation authorization)

The interface is implemented as an **extension of the existing interface for abattoirs in the QS database**, see interface specification https://www.q-s.de/softwareplattform/services/files/schnittstellen/schlachtbetriebe/230801_Schnittstelle_Systempartnersuche_en.pdf.

This document is intended as a guide. Technical details on fields and types can be found in the **WSDL**- file.

https://www.q-s.de/services/files/datenbank/schlachtbetriebe/open_access_akt.wSDL

In this document the messages are described with the English terms.

A **test system** is here: <https://test.qs-plattform.de/axis/services/rpcrouter?wsdl>

Function SelectQSTW(QSExtLocationStandardQuery)

Input: location number

(The *transmission of the production scope is possible but not necessary (0 or empty)*; as a production scope you can transmit a single one or an area (e.g: Input 2001 or 2000, only; see in the list of production scopes https://www.q-s.de/services/files/downloadcenter/fbuendler/arbeitshilfe/englisch/List_of_Production_Scopes_06.07.2023.xlsx).

Return: QSExtLocationQSTWReply

You receive all individual production scopes that are currently available with the following information to eligibility of delivery (QS) / participation authorization (animal welfare):

0= no	no eligibility of delivery
1= yes	eligibility of delivery for QS
2= inactive	(Pig production locations, which have been scheme participants for at least six months but no sampling was conducted, will get the status "inactive" and will be excluded from delivering pigs into the QS scheme until a sample is taken and verified in the salmonella database)
3= blocked	(no eligibility of delivery)

twCertification: Is there a participation authorization for animal welfare? true/false

Additional description, if applicable:

- FIAS, for a conducted FIAS audit
- FB, if it is a location run by the family
- REGIO, for a passed "Regionalfenster" audit
- INACTIVE, excluded from delivering pigs into the QS scheme until a sample is taken and verified in the salmonella database
- PREFAT, fattening – pre-fatteinign, only; blocked for the delivery of pigs to an abattoir
- UNOCCUPIED, poultry farms that do not have any housed birds = unoccupied, no eligibility of delivery in the QS scheme
- FREI, free range husbandry
- GGN, GlobalG.A.P. number
- PRODUCTS, fruit, vegetable, potato products
- NR, location number when searching with QS-id.
- QM-MILCH, certification scheme; with ++/HF3, if applicable
